Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User’s Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User’s Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User’s Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began with the 2002 Monograph. Numbers reported here are not directly comparable to those published before the 2002 Monograph. See the User's Guide to Inpatient Tables for details.
%Cases is the percent of all cases from this hospital service area which were discharged from this hospital.
%SURG is the percent of cases from this HSA and hospital which had a surgical procedure.
Ranking is based on 2004 data.
Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.
