Conditions originating in the perinatal period	173	99.4	1	0.6	174	100.0
Congenital anomalies	59	59.6	40	40.4	99	100.0
Total	199,035	89.2	24,157	10.8	223,192	100.0

Emergency department visits include all hospital records (outpatient and inpatient) which originated in the ED.
Inpatient discharges originating in the Emergency Department (24,157 for 2004) are reported here as well as in the inpatient Monographs.
Inpatient discharges exclude newborns (MDC 15).
These tables are not comparable to tables published in the 2001 and 2002 Monographs because of the expanded definition of emergency department visits (see discussion in the User's Guide to Emergency Department Tables for details).

Emergency department visits include all hospital records (outpatient and inpatient) which originated in the ED.
Inpatient discharges originating in the Emergency Department (24,157 for 2004) are reported here as well as in the inpatient Monographs.
Inpatient discharges exclude newborns (MDC 15).
Total for age groups do not equal total for all ED visits due to 2 records with missing age data.
These tables are not comparable to tables published in the 2001 and 2002 Monographs because of the expanded definition of emergency department visits (see discussion in the User's Guide to Emergency Department Tables for details).

"Other" payer includes self-pay, no charge, and other sources of payment
Emergency department visits include all hospital records (outpatient and inpatient) which originated in the ED.
Inpatient discharges originating in the Emergency Department (24,157 for 2004) are reported here as well as in the inpatient Monographs.
Inpatient discharges exclude newborns (MDC 15).
These tables are not comparable to tables published in the 2001 and 2002 Monographs because of the expanded definition of emergency department visits (see discussion in the User's Guide to Emergency Department Tables for details).

New Hampshire hospital data provided by the New Hampshire Department of Health and Human Services.
Emergency department visits include all hospital records (outpatient and inpatient) which originated in the ED.
Inpatient discharges originating in the ED (23,643 for 2004) are reported here as well as in the inpatient sections of the Monograph.
Inpatient discharges exclude newborns (MDC 15).
These tables are not comparable to tables published in the 2001 and 2002 Monographs because of the expanded definition of emergency department visits (see discussion in the User's Guide to Emergency Department Tables for details).

Figure E1
Percent of Visits by Admission Day of Week and Type of ED Visit
2004 VT Hospital ED Visits, Includes VT Residents and Non-Residents

Error bars represent 95% confidence intervals

Figure E2
Percent of Visits by Admission Day of Week and Injury Versus Non-Injury Diagnosis
2004 VT Hospital ED Visits, Includes VT Residents and Non-Residents

Error bars represent 95% confidence intervals

Figure E3
Percent of Visits by Admission Hour and Type of ED Visit
2004 VT Hospital ED Visits, Includes VT Residents and Non-Residents

Error bars represent 95% confidence intervals

Figure E4
Percent of Visits by Admission Hour and Injury Versus Non-Injury Diagnosis
2004 VT Hospital ED Visits, Includes VT Residents and Non-Residents

Error bars represent 95% confidence intervals
