Consequence	36
Youth Substance Abuse Safety Program	36
Impaired Driver Crashes	38
Division of Liquor Control compliance checks	39
School-based grants	40
Conclusion & Contact Information	41

# Purpose of this Profile

This profile is provided by the Division of Alcohol and Drug Abuse Programs (ADAP), the State Epidemiological Outcomes Workgroup (SEOW) and the Research, Epidemiology, and Evaluation Unit of the Vermont Department of Health as a resource to the District Offices and community-based prevention partners.

# Purpose of this Profile

**This profile includes estimates of substance use/misuse prevalence from State surveys, as well as other data to assist the District Offices and prevention partners to focus on the following priorities for 2021:**

- 1) Build, maintain, and strengthen the state, regional and community level infrastructure capacity needed to address substance use and misuse prevention and intervention across Vermont, and
- 2) Prevent and reduce underage drinking, binge drinking, and marijuana use/ misuse among youth and young adults.

# Vermont Prescription Drug Monitoring Program (PDMP)

Vermont's PDMP, known as the **Vermont Prescription Monitoring System (VPMS)**, is a statewide electronic database of controlled substance prescriptions dispensed from Vermont-licensed pharmacies that became operational in January of 2009.

VPMS collects, monitors and analyzes electronically transmitted prescribing and dispensing data submitted by pharmacies and dispensing practitioners. This information is used to support and coordinate clinical care and substance misuse prevention, and to assist in understanding the patterns of controlled substance prescribing and dispensing in Vermont.

Source: [Vermont Prescription Monitoring System](#)

# Vermont Prescription Monitoring System (VPMS)

VPMS quarterly reports summarize data for all Schedule II – IV prescriptions that were dispensed by Vermont-licensed pharmacies. The next slide includes data from the VPMS quarterly report covering the period of 07/01/2020 - 09/30/2020. The drug types included are:

- Opioid Analgesic – opioids used to treat pain
- Medication-Assisted Treatment (MAT) Opioids – opioids used to treat opioid use disorder
- Benzodiazepines – sedatives used for anxiety, insomnia and other conditions
- Stimulants - medication used to increase alertness, attention, energy

Source: [VPMS 2020 Quarter 3 Report](#)

# Percent of Population Receiving At Least One Prescription in Drug Class, July - September 2020

	OPIOID ANALGESIC	MAT	BENZODIAZEPINE	STIMULANT
ADDISON	3.8%	0.9%	3.4%	2.3%
BENNINGTON	4.8%	1.8%	4.9%	3.5%
CALEDONIA	4.0%	0.7%	3.5%	2.9%
CHITTENDEN	3.3%	0.9%	4.0%	2.9%

WINDHAM	4.4%	0.8%	4.9%	4.0%
WINDSOR	2.9%	0.9%	3.0%	1.7%
Vermont	4.0%	1.1%	4.0%	2.7%

# Morphine Milligram Equivalents (MME) to measure opioid prescriptions

Using Morphine Milligram Equivalents (MME) allows for comparison between types and strengths of opioids.

MME is a way to express the strength of an opioid analgesic prescription as though the prescription were converted to morphine.

For instance, the following medications each provide 50 MME/day:

- 10 tablets of hydrocodone/acetaminophen 5/300
- 2 tablets of oxycodone sustained-release 15 mg
- <3 tablets of methadone 5 mg

Source: [VPMS 2020 Quarter 3 Report](#)

# The total amount of opioids dispensed has decreased over time

Vermont Total MME Dispensed by Quarter

Since Quarter 1 of 2016, the Vermont total MME has decreased by over 44%

Q1: January-March Q2: April-June Q3: July-September Q4: October-December

# School-Based Substance Abuse Service Grants in Supervisory Unions funded for Fiscal Year 2021

Addison Northwest SU

Champlain Valley SD

Franklin Northeast SU

Lamoille South SU

Maple Run Unified SD

Mount Mansfield Unified Union SD

Slate Valley Unified Modified SD

Southwest Vermont SU

Springfield SD

Two Rivers SU

Windham Central SU

Windham Northeast SU

Windham Southeast SU

Windham Southwest SU

Windsor Central SU

The purpose of these grants is to provide and enhance substance abuse prevention and early intervention services in Vermont schools, leading to reductions in students' alcohol and other drug use.

See the **[Alcohol and Drug Abuse Prevention Dashboard](#)** for information on the percent of students screened and referred to treatment.

# Conclusion and Contacts

- These data are presented to assist the District Offices and community partners in all types of planning, needs assessment, community outreach, and prevention work surrounding alcohol use, binge drinking, marijuana use, and prescription drug misuse.
