The Vermont Department of Health would like to acknowledge the work and effort of all the schools, teachers and students who participate in the Youth Risk Behavior Survey each year.

Visit the Vermont Department of Health YRBS website at: <http://www.healthvermont.gov/yrbs>

About the YRBS

The Youth Risk Behavior Survey (YRBS) is a national school-based survey that monitors the health-risk behaviors that contribute to the leading causes of death and disability among youth and young adults. These include:

- Behaviors that contribute to unintentional injuries and violence
- Alcohol and other drug use
- Tobacco use
- Unhealthy dietary behaviors
- Inadequate physical activity
- Sexual health behaviors related to unintended pregnancy and STDs

The YRBS also measures other high priority health-related behaviors and protective factors. These include:

- Prevalence of obesity
- Attitudes and perceptions related to substance use
- Food and housing insecurity
- Youth assets
- Academic achievement
- Sexual Orientation and sex of sexual contacts

In Vermont, the YRBS has been conducted during the spring semester of odd years since 1993.

Methodology

The YRBS is conducted every two years during the spring semester. In Vermont, the Department of Health works with the Agency of Education and the CDC to conduct two separate surveys: a high school survey of students in grades 9 through 12, and a middle school survey of middle school students in grades 6 through 8. These surveys are conducted as a census at all public schools and select independent schools across the state.

The middle school and high school surveys differ slightly. The shorter middle school survey focuses more on lifetime behaviors and includes questions on fighting, bullying, suicidality, substance use, attitudes and perceptions about substance use, sexual activity, nutrition, physical activity, youth assets, and other factors related to health equity. The high school survey includes questions on these topics as well as more in-depth questions on current behaviors as well as self-reported height and weight, driving behaviors, and other drugs used.

Student participation in the YRBS is anonymous and voluntary. During the spring semester schools were asked to set aside a class period, such during all math classes or during a specific period, to administer the survey. Students were read a set of directions and completed a self-administered paper and pencil questionnaire.

In addition, numerous precautions are taken to ensure the reliability and validity of the results. The Centers for Disease Control and Prevention (CDC) runs over 100 consistency checks on the data to exclude careless, invalid, or logically inconsistent answers. These internal reliability checks help identify the small percentage of students who falsify their answers. The CDC also weights data, a mathematical procedure that makes data representative of the population from which it was drawn. Only states with an overall response rate of at least 60% are weighted based on gender, grade, and race/ethnicity. These precautions can reduce some sources of error, but not all.

Additional information about the methodology of the national, state, and large urban school district YRBS has been described elsewhere and can be found online from the CDC's Healthy Youth-DASH website at:

<https://www.cdc.gov/healthyouth/data/yrbs/methods>

Using the YRBS Results

Using the YRBS to engage students, schools, and communities

The YRBS can detect changes in risk behaviors over time and identify differences among ages, grades, and genders. With these data, school and community organizations can focus prevention efforts and determine whether school policies and community programs are having the intended effect on student behaviors.

Think of the YRBS as a tool for starting discussions, for educating the community, for planning and evaluating programs, and for comparing Vermont students with other students nationwide.

Start the Conversation: Use the YRBS to begin a conversation with teens about the personal choices they make or about the health of their community. Ask them if the results accurately reflect what they see happening around them. How do they explain the results? From their perspective, what is or is not working? How would they promote healthy behaviors?

Increase Awareness: The YRBS provides an opportunity to break through “denial” and make community members aware of the risks that their young people face. It can also dispel myths and correct misinformation about the “average teenager.” The YRBS can accentuate the positive and celebrate the fact that many students are abstaining from behaviors that endanger their health and their ability to succeed.

Plan and Evaluate Programs: The YRBS can serve as the basis of a community needs assessment. It can help identify strengths and weaknesses in communities and can inform strategies to address those weaknesses.

Remember to Look at the Positive Side: In most cases, the majority of adolescents are NOT engaging in risky behaviors. Although most of the charts examine the prevalence of risk behaviors, please do not forget about the percentage of adolescents who are NOT engaging in these behaviors.

Participate in Getting to 'Y': Getting to Y provides an opportunity for students to take a lead in bringing meaning to their own Youth Risk Behavior Survey data and taking steps to strengthen their school and community based on their findings. Schools and districts across the state form teams to analyze local level data, identify areas of strength and concern, and create a preliminary action plan. Through the Getting to 'Y' program, students attend a training day where they learn tools and strategies to examine data, explore root causes, and create next action steps. In addition, teams plan and host a community dialogue event to share their executive summary with the school and community.

For more information on upcoming Getting to Y trainings, newsletters, and resources visit [Getting to Y at http://www.upforlearning.org/initiatives/getting-to-y](http://www.upforlearning.org/initiatives/getting-to-y)

Populations in Focus

The Vermont Department of Health acknowledges that these inequities can have a greater impact than individual choices. To identify disparities and help tell the complex story of youth across Vermont, when possible, health-related factors and behaviors experienced by the following populations are noted:

- Sex (biological)
- Grade
- Race, Ethnicity
- Sexual Orientation

Populations presented vary depending on the size of the SU/SD or district. Smaller area may have limitations based on sample size that prevent all populations to be included.

To maintain anonymity and confidence in results, data is suppressed when the numerator is < 5 or the denominator is < 50 students. Suppression is indicated by a dot (.) and 'Too few students'.

Understanding and Interpreting the Results

The results in this report are weighted by gender, grade, and race/ethnicity in order to compensate for absenteeism and incomplete surveys. The weighting allows the results to be fully representative of middle school students in grades six through eight (middle school survey) and high school students grades nine through twelve (high school survey). Weighting permits us to draw inferences about the school-based student population in Vermont.

Throughout this report, statistically significant differences are noted for the overall estimates by comparing the local and statewide results. Comparisons are also made for students within a local area, such as between male and female students in a particular SU/SD.

Statistical significance is calculated by comparing the 95% confidence intervals of two or more values. If the confidence intervals overlap, the percentages are not different. In other words, the two groups are not statistically different from one another. If the confidence intervals do not overlap, there is a statistical difference between the two groups, indicating that the difference is caused by something other than random chance.

Smaller groups (e.g. a SU/SD, female students, etc.) tend to have wider confidence intervals, thus when compared with another group the two may not be statistically different. In other words, when comparing the responses of two or more groups, the overall percent's may look very different, but the two numbers are not statistically different.

While this report notes statistical differences, we encourage you to consider meaningful difference: does the disparity merit a targeted intervention, show a real change in health, or otherwise mean something important to the community (statistics aside).

HIGH SCHOOL RESULTS

FRANKLIN NORTHWEST SU (SU021) REPORT

<http://healthvermont.gov/yrbs>

SECTION 1: DEMOGRAPHICS

HIGH SCHOOL DEMOGRAPHICS		
	SU/SD	VT
Total	556	27349

		SU/SD	VT
Sex	Male	49%	51%
	Female	51%	49%
Grade	9th Grade	22%	25%
	10th Grade	30%	25%
	11th Grade	22%	25%
	12th Grade	26%	25%
Race / Ethnicity	White, non-Hispanic (WnH)	73%	83%
	Students of Color (REM)	27%	17%
Sexual Orientation	Heterosexual / Cisgender (Het/Cis)	91%	89%
	Lesbian, Gay, Bisexual, or Transgender(LGBT)	9%	11%

	Grade 12	9%	14%

SECTION 5: SEXUAL HEALTH
CURRENT SEXUAL ACTIVITY

HAD SEXUAL INTERCOURSE DURING THE PAST 3 MONTHS				
		SU/SD	VT	
Overall		34%	31%	Overall Differences: State vs SU
Sex	Male	29%	29%	VT and SU are Similar
	Female	39%	32%	Within SU Differences
Grade	Grade 9	22%	13%	Females > Males
	Grade 10	31%	24%	11 > 9
	Grade 11	43%	37%	12 > 9
	Grade 12	41%	48%	

USED ALCOHOL OR DRUGS PRIOR TO LAST INTERCOURSE, AMONG CURRENTLY SEXUALLY ACTIVE STUDENTS				
		SU/SD	VT	
Overall		25%	20%	Overall Differences: State vs SU
Sex	Male	.	22%	VT and SU are Similar
	Female	22%	17%	Within SU Differences
Grade	Grade 9	.	24%	Too few students by sex
	Grade 10	.	22%	Too few students in at least one grade
	Grade 11	.	18%	
	Grade 12	.	19%	

SECTION 5: SEXUAL HEALTH
CURRENT SEXUAL ACTIVITY

PREGNANCY PREVENTION METHODS USED, AMONG CURRENTLY SEXUALLY ACTIVE STUDENTS			
	SU/SD	VT	
No method was used	11%	7%	SU > VT
Birth control pills	25%	32%	VT > SU
Condoms	40%	35%	
IUD or implant	7%	13%	VT > SU
Shot/patch/birth control ring	6%	5%	
Withdrawal/other method	5%	5%	
Not sure	5%	2%	SU > VT

USED PRESCRIPTION BIRTH CONTROL (PILLS; AN IUD OR IMPLANT; OR A SHOT, PATCH, OR BIRTH CONTROL RING), AMONG CURRENTLY SEXUALLY ACTIVE STUDENTS			
	SU/SD	VT	
Overall	38%	50%	Overall Differences: State vs SU
Sex	Male	. 40%	VT > SU
	Female	50%	Within SU Differences
Grade	Grade 9	. 29%	Too few students by sex
	Grade 10	. 44%	Too few students in at least one grade
	Grade 11	. 51%	
	Grade 12	. 59%	

SECTION 5: SEXUAL HEALTH
CURRENT SEXUAL ACTIVITY

CONDOM USE, AMONG CURRENTLY SEXUALLY ACTIVE STUDENTS				
		SU/SD	VT	
Overall		62%	56%	Overall Differences: State vs SU
Sex	Male	.	61%	VT and SU are Similar
	Female	60%	52%	Within SU Differences
Grade	Grade 9	.	64%	Too few students by sex
	Grade 10	.	61%	Too few students in at least one grade
	Grade 11	.	58%	
	Grade 12	.	51%	

USED BOTH A CONDOM AND PRESCRIPTION BIRTH CONTROL TO PREVENT PREGNANCY AT LAST SEXUAL INTERCOURSE, AMONG CURRENTLY SEXUALLY ACTIVE STUDENTS				
		SU/SD	VT	
Overall		16%	19%	Overall Differences: State vs SU
Sex	Male	.	15%	VT and SU are Similar
