

Report Timeframe: June 2 to June 8, 2024

Current Vermont Department of Health recommendations on [preventing COVID-19](#).

Syndromic Surveillance

The Electronic Surveillance System for the Early Notification of Community-based Epidemics (ESSENCE) reflects all visits from participating emergency departments (ED). The chart below shows a rolling seven-day average of all ED visits in Vermont hospitals that include a COVID-19 diagnosis (emergency and non-emergency, in- and outpatient visits).

Emergency Department Visits with COVID-19 Diagnosis Seven-Day Rolling Average, Vermont Hospitals

Variant Proportions - Clinical Specimens

JN.1 and KP2 are the dominant circulating variants. Specimen quantities are limited to less than ten starting the week of 4/7 which may impact proportion accuracy. (Sources: LabCorp, Quest, Helix, Health Department Whole Genome Sequencing program.)

Variant Proportions – Wastewater Monitoring

KP.2 is the dominant circulating variant in wastewater.

Samples from two wastewater sites, Brattleboro and Ludlow, are sequenced to estimate the proportion of circulating variants.

Virus Concentrations and Trends – Wastewater Monitoring

Concentration levels are slightly elevated at some sites but generally remain low. Some week-to-week fluctuation is expected.

Montpelier, South Burlington and Essex Junction wastewater districts participate in [WastewaterSCAN](#). The graph below shows COVID-19 levels and trends over time in these districts.

SARS-CoV-2, Vermont

Data for Burlington’s North and Main plants are available through [Burlington’s Wastewater Monitoring Report](#).

Identified Cases

Vermont Weekly Case Counts/Rates

Note: Case counts and rates are calculated by *confirmed* and *probable* cases reported to the Health Department.

To calculate rates, counts are divided by 2021 Vermont population estimates for the respective category and expressed per 100,000 in each category.

Due to a high number of cases missing race/ethnicity data, rates are not provided for race/ethnicity categories.

COVID-19 Outbreaks Reported June 4 to June 10

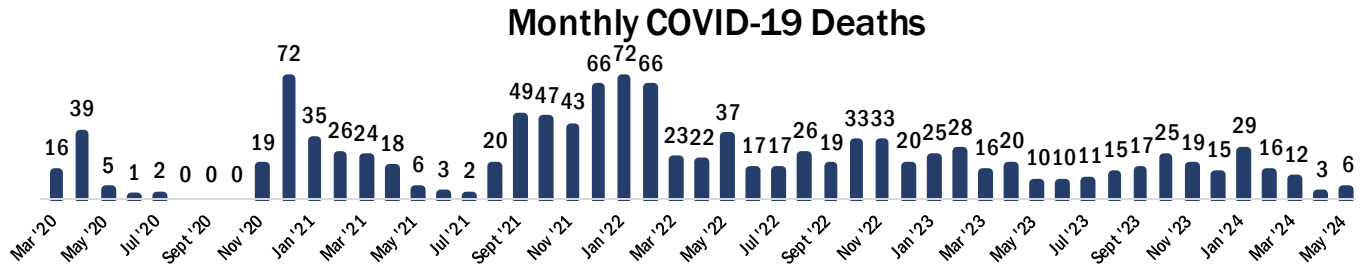

For purposes of this report, an outbreak is defined as three or more epidemiologically linked cases of COVID-19, where at least one case has been laboratory or clinically confirmed as COVID-19.

Facility type	New Outbreaks Reported 6/4 – 6/10
Long-term Care (LTC)	1
Non-LTC Healthcare	-
Correctional Facility	-
School/childcare	-
Other	-

County	New Outbreaks Reported 6/4 – 6/10
Addison	-
Bennington	-
Caledonia	-
Chittenden	-
Essex	-
Franklin	-
Grand Isle	-
Lamoille	-
Orange	-
Orleans	-
Rutland	-
Washington	1
Windham	-
Windsor	-

Cumulative COVID-19 Deaths as of June 8, 2024

Total	Age group								
	Under 10	10-19	20-29	30-39	40-49	50-59	60-69	70-79	80+
1155	2	0	2	11	20	75	114	264	667

Note: Deaths are from registered death certificates and represent preliminary data. A change in death count may represent new deaths, corrections, or other updates.
