

Report Timeframe: January 19 to January 25, 2025

Current Vermont Department of Health recommendations on [preventing COVID-19](#).

Syndromic Surveillance

The Electronic Surveillance System for the Early Notification of Community-based Epidemics (ESSENCE) reflects all visits from participating emergency departments (ED). The chart below shows a rolling seven-day average of all ED visits in Vermont hospitals that include a COVID-19 diagnosis (emergency and non-emergency, in- and outpatient visits).

Emergency Department Visits with COVID-19 Diagnosis Seven-Day Rolling Average, Vermont Hospitals

Variant Proportions - Clinical Specimens

XEC is the most common circulating variant. Some limited specimen quantities may impact proportion accuracy, specifically the weeks of 11/10-11/23/2024. For more timely data, see the [National SARS-CoV-2 Genomic Surveillance System](#) which includes data from Vermont and other states. Source: Vermont Department of Health Whole Genome Sequencing program.

Virus Concentrations and Trends – Wastewater Monitoring

Concentrations remain elevated in Montpelier and Burlington. Concentrations are moderately increased in South Burlington and Essex Junction, and low in Ludlow, Middlebury and St. Albans. Some week-to-week fluctuation is expected.

Montpelier, South Burlington and Essex Junction wastewater districts participate in [WastewaterSCAN](#). The graph below shows COVID-19 levels and trends over time in these districts.

SARS-CoV-2, Vermont

Data for Burlington’s Main plant is available through [Burlington’s Wastewater Monitoring Report](#).

Identified Cases

Vermont Weekly Case Counts/Rates

Note: Case counts and rates are calculated by *confirmed* and *probable* cases reported to the Health Department.

To calculate rates, counts are divided by 2021 Vermont population estimates for the respective category and expressed per 100,000 in each category.

Due to a high number of cases missing race/ethnicity data, rates are not provided for race/ethnicity categories.

COVID-19 Outbreaks Reported Date to Date

For purposes of this report, an outbreak is defined as three or more epidemiologically linked cases of COVID-19, where at least one case has been laboratory or clinically confirmed as COVID-19.

Facility type	New Outbreaks Reported 1/21 – 1/27
Long-term Care (LTC)	7
Non-LTC Healthcare	-
Correctional Facility	-
School/childcare	2
Other	-

County	New Outbreaks Reported 1/21 – 1/27
Addison	-
Bennington	-
Caledonia	1
Chittenden	2
Essex	1
Franklin	-
Grand Isle	-
Lamoille	1
Orange	1
Orleans	1
Rutland	1
Washington	1
Windham	-
Windsor	-

Cumulative COVID-19 Deaths as of January 25, 2025

Total	Age group								
	Under 10	10-19	20-29	30-39	40-49	50-59	60-69	70-79	80+
1247	2	0	2	11	20	78	126	278	730

Monthly COVID-19 Deaths

Note: Deaths are from registered death certificates and represent preliminary data. A change in death count may represent new deaths, corrections, or other updates.
