

Overview

This Psychoanalyst census is part of the Vermont Department of Health's healthcare provider data program, which is used to monitor and measure the supply of health care providers in Vermont over time. Vermont psychoanalysts are recertified every two years. Data for this report was obtained during the November 2020 recertification period and represents a snapshot of the profession at that time.

Psychoanalysts provide therapeutic services based on understanding the unconscious and how unconscious processes affect the human mind. In Vermont, psychoanalysts are required to have earned a master's degree, along with a specific degree or graduate certificate by an appropriately accredited psychoanalytic institute.

Psychoanalyst FTEs per 100,000 population by county

In Brief

Workforce

Survey period: November 2020
 Response Rate: 100%
 Licenses renewed: 38
 Active in VT: 19
 Full-time Equivalents: 9.3

Demographics

% Female: 68%
 Median Age: 69
 % 60 or older: 90%

Education and Training

% doctoral level (PhD, PsyD, PsyaD, MD/DO): 53%
 % educated in Northeast: 65%

Appendix

Active Psychoanalyst

A psychoanalyst who reported working in Vermont as a psychoanalyst (regardless of how many hours) is considered active.

Census

The census was taken during the biennial relicensing process which ended on November 30, 2020. The data include all licensed psychoanalysts except for new licensees enrolled less than three months before the renewal date (September – November 2020), as their license was valid until the next renewal date of November 30, 2022. Copy of census questions available upon request.

Full Time Equivalent (FTE)

Full time is defined as 40 or more working hours in Vermont per week, 48 weeks or more per year. Reporting more than 40 hours per week is defined as one FTE regardless of the number of hours over 40 per week worked.

Main Practice, Site, Setting, and Specialty

The main practice, site, setting, or specialty refer to the practice in which the psychoanalyst worked the greatest number of annual hours.

Map Quartiles

For county maps, colors define quartiles. The lowest 25% of FTE equivalents to population ratio is displayed in the lightest color, the middle 50% in medium, and highest 25% in the darkest color.

Missing data

Unless otherwise noted, missing data are excluded from tables. Thus, totals may vary from table to table.

Population Estimates

Population estimates are for July 2020 and were provided by the Department of Health.

States

States were grouped into the following regions:

Northeast	Midwest	South		West
Connecticut	Illinois	Alabama	North Carolina	Alaska
Maine	Indiana	Arkansas	Oklahoma	Arizona
Massachusetts	Iowa	Delaware	South Carolina	California
New Hampshire	Kansas	Florida	Tennessee	Colorado
New Jersey	Michigan	Georgia	Texas	Hawaii
New York	Minnesota	Kentucky	Virginia	Idaho
Pennsylvania	Missouri	Louisiana	Washington DC	Montana
Rhode Island	Nebraska	Maryland	West Virginia	Nevada
Vermont	North Dakota	Mississippi		New Mexico
	Ohio			Oregon
	South Dakota			Utah
	Wisconsin			Washington
				Wyoming

Weekly Hours

Average weekly hours is based on hours and weeks reported, adjusted to a full-time 48-week working year (hours * (weeks/48)). Thus, the average weekly hours for an individual working 40 hours a week for half the year (24 weeks) is 20.
