

Coming in 2026

The Family Care Plan (FCP)

In 2026, The Family Care Plan (FCP) is replacing the Plan of Safe Care as a care planning document for newborns born exposed to substances.

Highlights of the Revised Process Include:

- Patient-centered: Patients decide what information is shared and with whom
- Prenatal initiation (in OB office or with a nurse home visitor)
- Secure, electronic platform with built in 42 CFR consent
- Inclusive of additional SDoH questions
- Broader group of substances included
- Workflows for care coordination/sharing of the document
- Ability to update and reshare at any time during pregnancy
- Universal care planning document that can be used for any pregnant person
- Capacity to collect and track de-identified data across the state by region
