

# VDH-DSU

*December 15, 2025*

**Green Mountain Recovery Community (GMRC)  
OSAC**

## Services Offered

The **Green Mountain Recovery Community (GMRC)** is a Vermont-based recovery housing model designed to:

- Provide a **stable National Standard for Recovery Residences (NARR) Level III environment to facilitate recovery**, particularly for **justice-involved individuals**.
- Provide integrated whole-person care to those who are seeking structured recovery support including: \*
  - Co-occurring clinical substance use (SU) and mental health (MH) treatment services
  - Recovery services
  - Employment support services
  - Life skills support and training

## Structure and Participants

- Populations of focus include:
  - People with **substance use disorder (SUD)**
  - People with **co-occurring SU/MH**
  - People who are **justice involved**
- Referrals will be generated from various sources, including the **judicial system, Department of Corrections, residential treatment providers, community service agencies, and self-referrals**.

## Funding Need

**FY27 Request:** \$1.2M for start-up and initial operational costs of as many beds as possible. Estimated that this funding will allow VDH to support an additional 16 total beds.

\*Providers must have agreements in place to ensure individuals have access to healthcare and social services. Services may be provided on or off site.

## Why GMRC?

In October 2025, VDH hosted community roundtable events to hear from individuals in Vermont. Participants in the community roundtables identified that the State of Vermont needs to **expand Supports and Services across the full continuum. Attendees outlined that the State needed to expand capacity for recovery housing (including special populations).** These vocalized gaps are supported by Recovery Residence data and transportation needs highlighted below:

### *Identified Gaps*

**Recovery shelter and recovery housing bed capacity** (including special populations) in Vermont

**Co-occurring substance use and mental health services**, at all levels

Areas in Vermont lack access to Recovery Residences; access is also exacerbated by **gaps in the transportation system**

### *How GMRC addresses the gap:*

GMRC provides recovery beds, **particularly for justice-involved individuals**

GMRC offers integrated whole-person care including **co-occurring clinical substance use (SU) and mental health (MH) treatment services**

GMRC seeks to fill unmet need with **accessible recovery beds** in *appropriate locations* in the State of Vermont
