# Weekly COVID-19 Surveillance Report
## February 11, 2026

Syndromic Surveillance

The Electronic Surveillance System for the Early Notification of Community-based Epidemics (ESSENCE) reflects all visits from participating emergency departments (ED). The chart below shows a rolling seven-day average of all ED visits in Vermont hospitals that include a COVID-19 diagnosis (emergency and non-emergency, in- and outpatient visits).

Variant Proportions - Clinical Specimens

XFG and PQ are the most commonly sequenced variants. Limited specimen quantities may impact proportion accuracy. For more timely data, see the National SARS-CoV-2 Genomic Surveillance System which includes data from Vermont and other states.
